

3 OF THE BEST

CALF COMPRESSTION

UNDER £35

## 2XU VECTR CUSHION FULL LENGTH SOCK

**£30** Designed not only to compress for recovery, these also come with X-LOCK technology for plantar fascia and shin protection during your run. Zonal mesh and cushioning securely hold the foot in place. [2xu.com](http://2xu.com)

UNDER £45

## CEP RUN COMPRESSION SOCKS 3.0

**£44.95** Primed to stimulate active recovery during or after running, these long compression socks from CEP have a structured geometry to optimise blood supply and comfort. [cepsports.co.uk](http://cepsports.co.uk)

UNDER £130

## RIIXO CALF CUFF

**£128.99** The innovative Riixo cuffs work to compress your calves while further reducing inflammation and tightness. No need to plug into an energy source, the cuffs function by either heating or freezing before use. [riixo.com](http://riixo.com)

# RHA TRUECONNECT 2

**£129.95** RHA, official supplier for British Triathlon, launch their new durable, sweat-proof earbuds

Released as earbuds for everyday and active use, the TrueConnect 2s boast a host of improvements over their predecessor.

Aimed at endurance athletes, the new model claims a longer 44hr battery life, improved durability, and more microphones for noise isolation and call clarity.

Touted as 'Scottish-weather proof' (an IP55 sweat- and splash-proof rating should make them functional for outdoor training sessions at any temperature down to -20°C) Glasgow-based audio company RHA

says the TC2s focus is on sound clarity and fit, creating 'technology that connects'. The TC2s also include simple track and volume touch controls, seven different ear tip sizes, and each bud is said to weigh just 6g apiece.

The buds are built with Bluetooth 5 technology, which RHA say provide reliable connectivity and clear, immersive audio with a focus on quality.

We'll be testing the safety of the noise-isolating earbuds on busy Bristol streets soon, with a full review to follow. [rha-audio.com](http://rha-audio.com)
